Brachyglottis Walberton's® Silver Dormouse

Breeder: David Tristram
Protection status: EU PVR granted EU 18406
Community Trade Mark E733196

Characteristics:

Brachyglottis Walberton's® Silver Dormouse is an attractive compact dense and bushy plant with very silvery foliage – much more compact and more brightly coloured than Brachyglottis Sunshine. In addition, it freely produces showy rich golden yellow daisy flowers.

It has uses as a specimen for the border, or can be grown as a very attractive container plant. It also has uses in the amenity sector for mass planting and landscaping uses.

Hardiness: USDA zones 7 – 10 (minimum temperature -12 Celsius)

Bloom: golden yellow daisies in large clusters

Foliage: silvery grey above, intensely silver undersides

Habit: neat, compact and bushy. 90cm/36" high, 120cm/48" wide when mature

Propagation: cuttings.
Note: a licence is required for propagation.

Culture: sunny position, well drained soil.

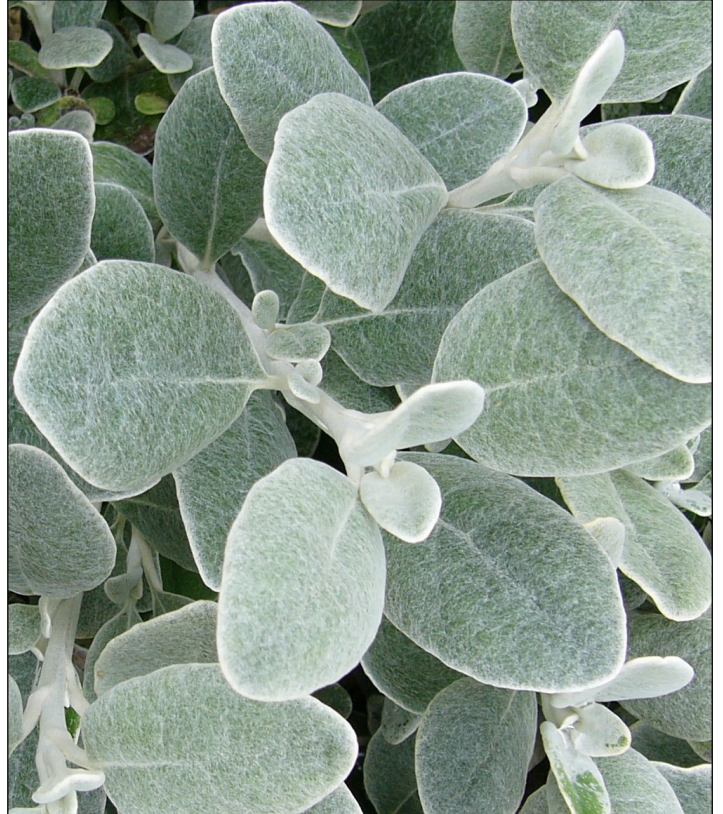

Additional information:

Already popular in the UK, this plant makes an excellent 2, 3 or 5 litre container plant for impulse sales. It can also be grown on to larger specimen sizes.

Executive Director: Graham Spencer DipM MCIM
Registered at Cardiff, number 4664540
Registered office: 74-76 Aldwick Road, Bognor Regis, West Sussex, England PO21 2PE
All correspondence should be sent to the address at the head of this page.

Above: Brachyglottis Walberton's® Silver Dormouse in flower.

Above:
the foliage is stunning bright silver, the leaves larger and more rounded than other varieties.

Left:
Brachyglottis Walberton's® Silver Dormouse in a 3 litre container. Note that this variety does not produce bare stems with dead leaves at the base, which can be a problem with Brachyglottis Sunshine.

Brachyglottis Walberton's® Silver Dormouse

Licence required for propagation. Contact Plants For Europe Limited for details.

Note: the inclusion of any plant in PFE's portfolio listing is not an offer for sale of that plant, and is merely intended to create interest in licences for propagation. In every case, the breeder's rights are preserved, and the breeder retains all rights in the intellectual property in that plant.
