Erysimum Walberton's® Fragrant Sunshine

Breeder: David Tristram
Protection status: EU: PVR granted EU 21586
US: US Plant Patent number 13,432
Canada: registered with COPF
Australia: PVR applied for – file number 2004/276
In all cases, the UPOV name WALFRASUN is used.

Characteristics:

Walberton's® Fragrant Sunshine is a very compact Erysimum variety with dense bushy growth. Wonderful bright yellow scented flowers, some of which are speckled with red when in bud, are carried over a long season – an attribute resulting from its sterile nature.

Walberton's® Fragrant Sunshine makes a splendid container plant for patio use. It can also be used in the perennial border, or as a bedding plant in colder districts.

Hardiness: USDA zones 7 – 10 (to be confirmed by trials)
Bloom: bright yellow. Very scented. Very long season.
Foliage: dark blue-green
Habit: neat bushy dome habit. 30cm/12" high by 45cm/18" wide when mature.
Propagation: cuttings
Note: a licence is required for propagation.
Culture: sunny position, well drained soil.

Additional information:

Walberton's® Fragrant Sunshine is already well established in the UK market, where many tens of thousands are sold each year by FarPlants (more than 50,000 in 2007). It makes a fantastic 1.5 litre specimen for impulse sales.

Executive Director: Graham Spencer DipM MCIM
Registered at Cardiff, number 4664540
Registered office: 74-76 Aldwick Road, Bognor Regis, West Sussex, England PO21 2PE
All correspondence should be sent to the address at the head of this page.

Left: a 1.5 litre specimen, ready for sale. This variety normally produces three or four heads of flower on this size finished plant, with repeat flowering to follow.

Right: masses of flowers and sumptuous dark green foliage on a neat dome-shaped plant.

Erysimum Walberton's® Fragrant Sunshine

Licence required for propagation. Contact Plants For Europe Limited for details.

Note: the inclusion of any plant in PFE's portfolio listing is not an offer for sale of that plant, and is merely intended to create interest in licences for propagation. In every case, the breeder's rights are preserved, and the breeder retains all rights in the intellectual property in that plant.
