Malcolm Spencer's Croftway® Phygelius

Breeder: Malcolm Spencer

Protection status: Worldwide breeder's rights asserted.

EU PVR granted (number in brackets below):

- Phygelius Croftway® Coral Princess (CROCORPRI) (EU20333)
- Phygelius Croftway® Purple Prince (CROPURPRI) (EU20332)
- Phygelius Croftway® Red Emperor (CROREDEMP) (EU20334)
- Phygelius Croftway® Snow Queen (CROSNOQUE) (EU20335)
- Phygelius Croftway® Yellow Sovereign (CROYELSOV) (EU20336)

US Plant Patent granted and COPF registration (except for CROREDEMP).

Applications pending in three other countries.

Characteristics:

The first five varieties from the biggest and most comprehensive breeding programme with the genus *Phygelius* have now been released!

The Croftway® varieties are significantly superior to others that are currently available. The principal improvements are to habit (compact and bushy, without the need for growth regulators), resistance to overhead watering (which causes significant damage in other varieties), bloom density (far greater than existing varieties) and new colours – including the world's first pure white variety!

Phygelius are excellent plants for the border or container garden. In cold areas they can be used as striking bedding plants.

Hardiness: plants in trials in the UK have survived minus 9 Celsius. Hardiness trials in the US are on-going.

Bloom: sturdy stems carry large numbers of tubular flowers from May to October. Peak bloom in May. Five colours – see descriptions.

Foliage: deep green and attractive.

Habit: compact and bushy with upright flower stems.

Propagation: soft cuttings. **Note: a licence is required for propagation.**

Culture: sunny position, well drained soil.

Executive Director: Graham Spencer DipM MCIM

Registered at Cardiff, number 4664540

Registered office: 74-76 Aldwick Road, Bognor Regis, West Sussex, England PO21 2PE

All correspondence should be sent to the address at the head of this page.

Additional information:

Malcolm Spencer has been breeding Phygelius for 15 years at Croftway® Nursery, and is still working at developing more varieties for the future. Trials have shown that these plants make attractive impulse purchase items in 1.5, 2 or 3 litre pots and finish quickly when grown from rooted cuttings. Licences will be issued for all five varieties as a group, or for individual varieties.

Phygelius

Croftway® Snow Queen – the world's first pure white flowered Phygelius variety, with no hint of cream or ivory.

Licence required for propagation.

Left: **Phygelius
Croftway® Coral Princess** -
notice the density of flowers on the
stem.

Above right: **Phygelius Croftway®
Red Emperor** – an excellent red
colour.
This variety is slightly taller than the
other varieties.

Licence required for propagation. Contact Plants For Europe Limited for details.

Left: **Phygelius Croftway® Yellow Sovereign** – a slightly deeper shade than the widely grown variety Yellow Trumpet, and also with the very large quantity of flowers associated with Malcolm Spencer’s varieties.

Right:
Phygelius Croftway® Purple Prince
– note the huge quantity of flowers!

Licence required for propagation. Contact Plants For Europe Limited for details.
