

Salvia

Ember's Wish

STRIKING CORAL RED

Origin: bred in Australia

Protection status:

EU and UK PVR granted

Variety name: Salvia SAL 0101

Benefits of this variety:

- Perfect partner for Salvia Wendy's Wish!
- Striking colour—coral red flowers with coral calyces.
- Makes a stunning plant for larger containers.
- Responds well to pinching when young to make a bushy plant with many stems of flowers - from early summer until autumn - it never stops!
- Attracts bees.

Characteristics:

- Height: 80cm; width 80cm (when mature).
- Flowering time: June to September.
- Foliage: mid to deep green. Dark maroon stems.
- Habit: compact and slightly spreading.
- Culture: full sun, well-drained soil.
- **Silver Award winner at Plantarium 2014**
