

Salvia officinalis

GardenZest®

IntenseSage

**EXCELLENT PERFORMANCE FOR
GARDEN OR CONTAINER**

Origin: bred in the United States

Protection status:

Breeder's rights asserted

Variety name: Salvia officinalis G12-338

Benefits of this variety:

- Darker green-grey than Berggarten.
- Slightly cupped leaf with rugose texture.
- Excellent plant presentation—makes a very attractive container or garden plant.
- Intense flavour and aroma.
- Rich blue flower, larger than other varieties. But flowers are rare and late.
- US production trials suggest improved resistance to downy mildew.

Characteristics:

- Vegetative propagation.
- Height: 30cm
- Width: 45cm
- Broadly upright habit.
- Large and heavily rugose leaves.
- Needs to be vernalized for flowering.

Wholesale suppliers:

- Botanics International
- Elsner PAC
