

Nepeta x faassenii

EarliBlue

FIRST TO FLOWER

Protection status:

breeder's rights asserted

Variety name: Nepeta x faassenii G20-010

Benefits of this variety:

- The first Nepeta to flower: earlier than competitor varieties by 10 days in trials.
- Good cutting yield.
- Long season: doesn't go yellow after flowering.
- Reduced vernalisation needed for flowering.
- Doesn't break open: robust.

Characteristics:

- Height: 45cm when mature.
- Width: 90cm when mature.
- Large florets on thick flower spikes.
- Compact, bushy habit.
